PROJECT EXPERIENCE

I have successfully completed over 100+ customized system development projects (April 2024 – June 2025), by using vibe coding showcasing your skills in full-stack web development, mobile app development, database design, user authentication integration, and real-world IT solutions. Below are a few highlighted systems:

- Customer Relationship Management System
- Core Human Capital Management
- Inventory and Warehousing System
- Claims and Reimbursement System with Login
- Visitor and Event Management System with User Access
- Legal and Procurement Management
- Hospital Management with Admin/User Roles
- Payroll and Employee Self-Service Portal
- Learning and Training Management System
- Fleet, Fuel, and Booking Systems
- Flight and Hotel Billing Management System
- PHP Mailer + SMS Integration Feature
- Customized Customer Request Fulfillment System – Enabled clients to define and request specific functions that were transformed into real-time modules; included dynamic request handling, approval workflows, and user feedback integration.
- **Quiz App with Firebase Authentication** – Android-based app allowing users to take quizzes, track performance on a leaderboard, and earn points that can be swapped for GCash money.
- **PetFinder App** – Mobile app that generates pet information and uses QR code scanning to retrieve and display individual pet profiles.
- **KidsLearning App** – Engaging educational app featuring fingerprint login, interactive videos, and trivia quizzes tailored for children.
